

## LEADER Equipment for Priority 1 – Farm Productivity

SECTOR	DEFINITELY NOT ELIGIBLE	DEFINITELY ELIGIBLE
<b>General</b>	Tractors	
	Material Handlers	
	Excavation and earth moving equipment	
	Flat bed trailers	
	Tipping trailers	
	Hedge Cutter	
	Hedge Trimmer	
	Post driver	
	Cow tracks	
	Basic footpaths	
	General purpose buildings including workshops	
	Workshop and maintenance equipment	
	Installation of new power supply	
<b>Arable &amp; Grassland</b>	Combine Harvesters	Remote crop sensing systems
	Grain Trailers	Crop robotics
	Forage Harvesters	Rain water harvesting and recycling
	Crop harvesting equipment including potato, sugar beet, vegetable and salad crop harvesting	Controlled atmosphere storage
	Cultivator	
	Subsoiler	
	Plough	
	Mole Plough	
	Soil Aerators	
	Land drainage equipment	
	Seed drill	
	Harrows	
	Rotavator	
	Roller	
	Sprayer	
	Fertiliser Spreader	
	Potato Planter	
	Mower and mowers with conditioners	
	Rake	
	Buck rake	
	Bale lifter	
	Bale rake	
	Grass rake and turners	
	Bale wrapper	
	Balers, conventional, round & square	
	Flat bed trailers	
	Backhoe loader	
	Front end loader	
	Forklift / material handler	
	Grain handling equipment including grain buckers	
Grain store		

	On farm grain dryer	
	All GPS Systems	
	Nutrient Sensors	
<b>Slurry / Manure Management</b>	Manure / slurry spreader	Trailing shoe slurry system including GPS and macerators as part of the application equipment
	Slurry tanker	Slurry separator but not associated reception pit and storage facilities
	Slurry stores	
	Slurry Separators	
<b>Dairy Sector</b>	Bulk milk tank	Cluster flush
	Milking parlour	Robotic milking systems
	Livestock feed preparation and rationing equipment including feed mixer wagons, mill, pelleters, mixers and complete diet feeders	Automatic footbaths
	Milk pumps	Vacuum pumps
	Milk jars	
	Teat sprays and teat dips	
	In parlour recording and monitoring	
	Automatic cluster removers	
<b>Livestock</b>	Livestock trailer	LED lighting systems for livestock housing
	Yard scraper	Recycling poultry litter systems
	Feed trough	Gait analysis systems
	Static livestock handling systems, races, pens, gates and hurdles	Collar based rumination systems
	New livestock buildings	Calving detectors
	Basic cattle crush	Electronic weigh systems linked to EID
	Buildings and structures used for fodder storage and bedding storage	Oestrus detection in suckler cows
	Dehorners	Real time monitoring for pig production
	Castrators	Mobile handling systems
	Cubicles	Air scrubbers and heat exchangers
	Dirty water systems (as these tend to be different to slurry handling)	Water filtration systems
	Silage pits / clamps	
	Roofs for slurry stores and silage pits
